

## Colour in a golden eagle

The Museum has a golden eagle on display in the special exhibition Cabinets of Curiosity.

A golden eagle is a huge bird of prey. It has broad wings and a long tail and likes to soar and glide on the air currents, holding its wings in a shallow 'V'. It is a territorial bird and often has a territory that has been passed on from generations before. Golden eagles live in the wild open moorlands of Scotland.

Using felt tips or colouring pencils, add details and colour inside this outline of an eagle.
