

Make a 3D sheep

You will need: cardboard roll, pencil, scissors, paint, paintbrush, scrap of thin card (from a cereal box or similar), fine nib permanent marker, felt tip pen (optional).

Instructions:

1. On a cardboard roll, draw a sheep – please see the pictures below which show you the front, back and sides views (left to right).

2. Cut out – please see the picture, below, that shows how the cardboard roll looks after it is cut out.

3. Paint the sheep inside and out. Leave to dry.
4. On thin card, cut out two small circles (eyes). Add pupils with the permanent marker or a felt tip pen.
5. Gently fold the head forwards.
6. Glue on the eyes and add details to the sheep with the permanent marker.
7. Your sheep is complete! You can imagine its adventures in the fields of West Berkshire.

Fun facts: Newbury and the surrounding area once became rich because of the wool trade. One of the reasons is that it's always been a good area for sheep farming. In fact, one of the largest sheep fairs in the country is still held at East Ilsley.
