

Colour in the teddy bear

This is a tiny red/brown fabric teddy bear that is from a dolls house. Its arms and legs move.

The teddy bear was first made in the early twentieth century and legend has it that it was named after U.S president Theodore "Teddy" Roosevelt. The first teddy bears were closely modelled on real bear cubs, but their design has greatly varied since in form, style, colour and material.

Using felt tip pens or colouring pencils, colour in the teddy bear.
