

Dinosaur! Make a Cetiosaurus

This dinosaur is simple to make from basic craft materials.

You will need: cardboard roll, pencil, scissors, white and green paint, paintbrush(es), fine nib permanent marker (black).

Instructions:

1. Use a pencil to draw your dinosaur on the cardboard roll. Please see the pictures below (from left to right: front, back and sides). Cut out with scissors.

2. Paint the dinosaur in green (inside and out). Leave to dry.
3. Bend the front of the dinosaur to form the head.
4. Gently shape the back of the dinosaur to form a curved tail.
5. Draw on the eyes using the fine nib permanent marker.
6. Add details (to the eyes and feet) using white paint. Leave to dry.
7. Your dinosaur is ready to roam! Imagine some adventures for your dinosaur.

Fun facts: This dinosaur is based on a Cetiosaurus, which lived in England during the mid-Jurassic (170-160 million years ago). It was a type of dinosaur called a sauropod and was a plant-eater. It could grow to be up to 18 metres in length!
